- How to properly adjust the Transfer Brush Assembly.
- Importance of proper lane cleaning procedures.
- How to use the Drop Brush function.
- Pattern tips.

Spring is the perfect time to get your lane machine tuned up and ready for the new season.

The **TASK Force Technical Services Technicians** will share their expertise on lane machine maintenance with you. The TASK Force technicians have reached Kegel's highest level of certification as installers and are factory certified installation specialist for Brunswick and AMF as well. Their technical expertise and ability to visualize problems has allowed them to solve hundreds of mechanical problems over the phone and on site. We are sure we can help you too, by teaching you expert tricks and techniques to keep your machines operating smoothly with minimal downtime.

Contact **any of our salesmen or customer service representatives** to reserve your spot for the seminar or to schedule an appointment and keep your lane machines running smoothly.

Think Bowling, Think Classic.
